Re: Asphalt Plant Approval  
NYS DOT Facility No. H0352

Dear Mr. Ryan:

On September 25, 2018, the QA & Construction Safety Bureau (QA&CS) conducted an audit of facility H0352 located at Foot of Passaic St. Newark, NJ 07104. Based on the audit results, this facility is approved to supply Hot Mix Asphalt (HMA) to NYC DDC projects through the end of calendar year 2019. This is contingent upon the facility demonstrating that NYSDOT inspected and issued an approval letter in calendar year 2019.

Please be advised that all HMA mix designs used on DDC projects are subject to QA&CS approval. The generic mix designs, once approved, are valid for a period of two years from the approval date. Please contact Carlos Ortiz at (718) 391-2311 if you require further information regarding DDC specifications or mix design approval.

This approval is subject to satisfactory performance and compliance with NYC DDC specifications.

Please be advised that DDC QA&CS intends to perform annual and periodic audits of all HMA plants to ensure continued compliance.

Very Truly Yours,

John M. DeVito
